1. When using RDAP anonymously it is not possible to look up organisation contacts or person contacts
2. Data is displayed for organisations, data for private individuals is limited. Name, post address, person-ID and phone number is not available. See tables below for more information.

In addition to look ups, a number of search functions are available for authenticated registrars. A search will only show results for domain names in the registrar's portfolio.

A detailed description of the search functions can be found in the [technical description of RDAP](#).
